

Oro AI Agent

Tasks on demand.

Business replies, 24/7.

AI that works with your business context,
your connected channels and your rules.

The work keeps coming

01

Customers need answers

Availability, pricing and opening hours across different channels.

02

Owners need work finished

Product updates, sales reports and the next campaign plan.

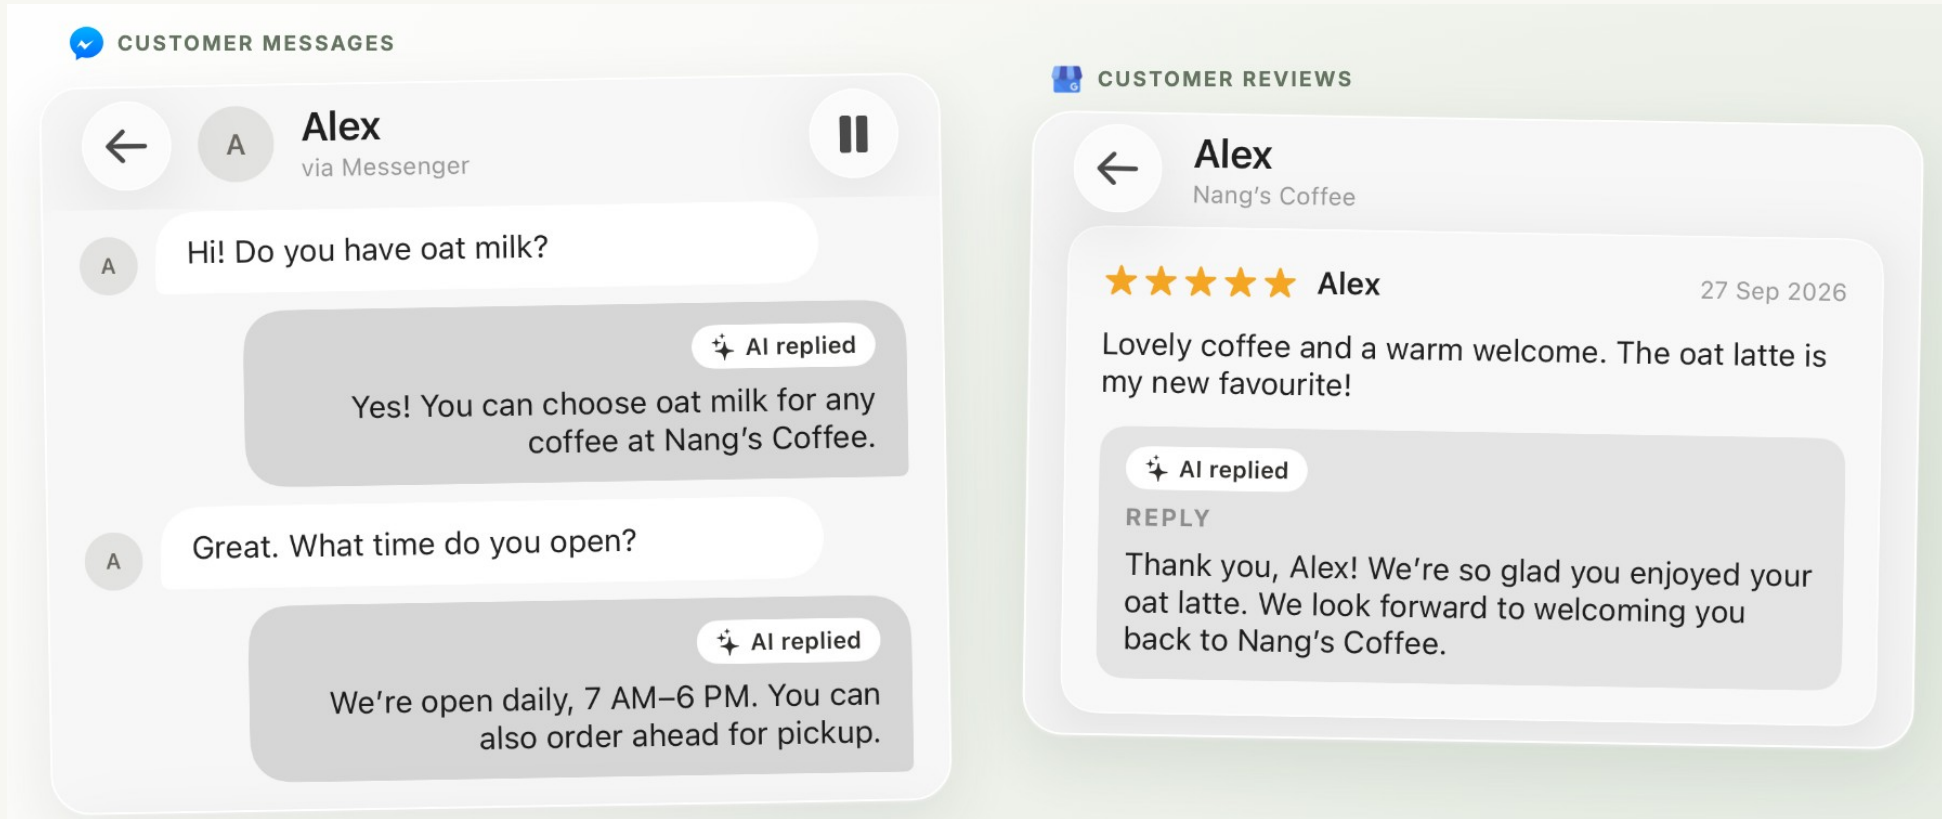

03

Context lives in separate places

Messages, product information, files and day-to-day operations.

Business replies, on autopilot

Your products and rules shape every response.

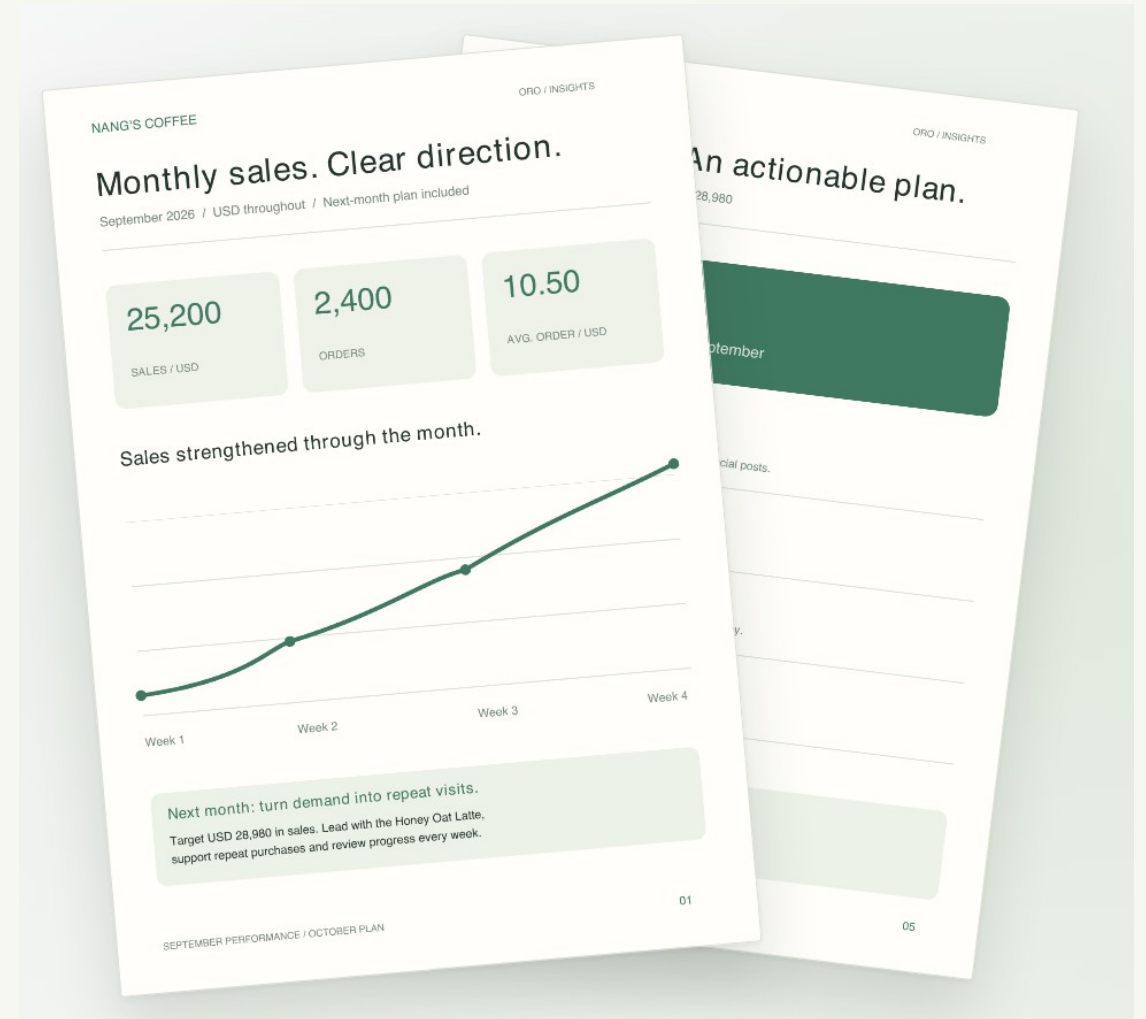

Messenger / Instagram / Telegram / Google Business Profile

Owners ask. Oro executes.

**“Analyze this month’s sales.
Create next month’s plan.”**

Oro works in an isolated cloud workspace and returns usable files.

**Reports and websites
Connected tools and iPhone actions**

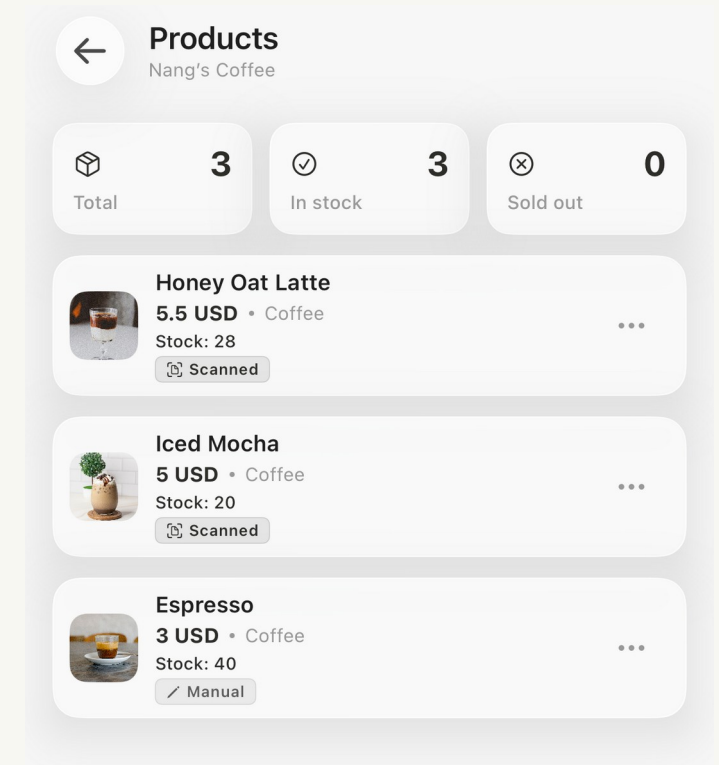

Product demonstration with sample business data

For small businesses around the world

Retail, cafés and service businesses that sell through conversations.

GLOBAL CUSTOMER ACQUISITION

- 01 Onboard businesses around a repeatable workflow
- 02 Support multilingual customer conversations
- 03 Grow through repeat use and customer referrals

Native product catalog

Free entry. Paid capacity.

300

free credits, refreshed daily

An accessible way to try a real business workflow.

\$4.99–\$59.99

USD / month

Subscriptions add monthly credits and capacity for more businesses.

RevenueCat powers in-app purchases and entitlements.

Long-term B2B revenue

24 SEP 2026

App Store launch

Native iPhone and iPad product.
Business replies and tasks in one app.

CURRENT CUSTOMER BASE

50+

paying business customers

Retain customers and expand
recurring subscription revenue.

Customer count reported by the founder · 1 October 2026

Cloud operations today. GPU evaluation next.

RUNNING TODAY

Native SwiftUI app
TypeScript on Google Cloud Run
Managed AI model APIs
Isolated cloud task workspaces

PROPOSED COMPUTE WORK

Benchmark open-weight inference
Evaluate multilingual task quality
Measure latency and cost per task
Use owned or licensed evaluation data

Cloud credits would support controlled evaluation before a production decision.

Building for business owners everywhere

Than Kywal Nyein
